- Testing & automation basics (Robot Framework)
- CI/CD fundamentals

Languages

Finnish – Native

English – Professional working proficiency

Work Experience

2024->

Stark Suomi

Yard Sales Associate

In May 2024, I started working at Stark Suomi Jyväskylä as a yard salesperson. In my work, I have learned customer service skills, how to solve difficult situations in a customer-oriented way and in the best interests of all parties. Due to the seasonal nature of the work, I have learned to work efficiently under pressure and in a hurry. My work also included partial warehouse management, picking products and loading and unloading warehouse loads. I also learned to work better in our own team

2022-2023

Is-Vet Oy

Assembly Worker

I worked at Is-Vet for almost the entire year of 2022 in the same tasks as in 2021. In addition to these tasks, I did a lot of work in the warehouse and shipping department during the late summer and autumn. So I packed furniture onto pallets and made sure it arrived intact. I also got a lot more responsibility than in 2021. At the beginning of 2023, I completed my military service, after which I continued working at Is-Vet in the same tasks as in the summer of 2023.

2021

Is-Vet Oy

Assembly Worker

I worked at the Is-Vet factory in the summer of 2021. I was in assembly work, assembling various teaching aids and doing some work in the warehouse.
